Patent Claims

1                   1. Fitting (2) for a glass door (1), comprising a strip tab (5) and a counterplate  
2 (11), wherein the glass door (1) is provided with a glass cutout (4) in which the fitting (2)  
3 engages, this fitting (2) being provided with lighting means (7), wherein the lighting means (7)  
4 are arranged in the glass cutout (4).

1                   2. Fitting according to claim 1, characterized in that the lighting means (7) are  
2 arranged at the front edge of the fitting (2).

1                   3. Fitting according to one of the preceding claims, characterized in that the  
2 lighting means (7) are provided on the upper side and/or on the lower side of the fitting (2).

1                   4. Fitting according to one of the preceding claims, characterized in that the  
2 lighting means (7) are received in a cavity formed between the glass cutout (4) and the fitting (2).

1                   5. Fitting according to one of the preceding claims, characterized in that the  
2 cavity is at least partially filled with an electrically insulating seal (9).

1                   6. Fitting according to one of the preceding claims, characterized in that the  
2 lighting means are formed as LEDs (7) or the like.

1                   7. Fitting according to one of the preceding claims, characterized in that the  
2 LEDs (7) are connected to a board (8).
